

PROJECT STATUS REPORT

PREDICTING DEFECTS IN PARTS MADE VIA ADDITIVE MANUFACTURING

AS OF 4/8/2024

PROJECT STATUS SUMMARY

Percent Complete: ~80%

Scope	Schedule	Cost	Risks	Quality
-------	----------	------	-------	---------

Schedule: The project is proceeding on schedule. We are still on track to finish the hole analysis algorithm by the end of the semester, but it is taking a bit longer than expected due to some final error fixing. AWS implementation is going well and is also on track to be finished by end of semester.

Risks: N/A – no risks as of yet.

WORK PLANNED FOR LAST WEEK

Continue to work on fixing hole analysis errors, continue to implement AWS infrastructure package.

WORK COMPLETED LAST WEEK

- Hole analysis errors are almost entirely fixed, and AWS continues to truck along towards completion

WORK PLANNED FOR NEXT WEEK

This upcoming week, we are:

- Continue implementing cloud architecture, specifically adding the last few API methods
- Begin testing hole analysis

OPEN ISSUES

N/A

DELIVERABLES AND MILESTONES

This section is a table which shows the status of milestones and deliverables.

The first column is for the name of the Milestone or Deliverable from the project plan. The next column is the WBS unique ID number. This ties it to the milestone/deliverable in the project plan. The “Planned” column is the planned completion date according to the baseline. The “Forecasted” column is the expected completion date for this item. The “Actual” column is the actual date the milestone/deliverable was completed. The “Status” column is a simple one or two word phrase such as; “Completed”, “On Schedule”, “Late”, “Accepted”, etc.

Milestone	WBS	Planned	Forecasted	Actual	Status
Set-up VMs		10/02/23		10/7/23	Complete
Implement shrinking sphere		11/09/23		11/13/23	Complete
Offline visualization		11/09/23		11/13/23	Complete
Deliverable	WBS	Planned	Forecasted	Actual	Status
Shrinking sphere optimization		12/23			Delivered
Offline visualization optimization		12/23			Delivered
Hole depth algorithm implementation		3/24			In Progress
Cloud hosting of project		4/24			In progress

OPEN CHANGE REQUESTS

Use this section to track all changes to the project scope and report the status of those changes. Tracking of changes starts with the request for the change, tracks the approval status and ends when the change is added to the project, the project plan and schedule have been updated and the change has become integrated into the project.

Change Request Name	Change Request Number	Request Date	Current Status
Investigate polygon resolution heuristic feature	1	11/1/24	Complete
Drag/drop files for visualization	2	1/17/24	Done

KEY PERFORMANCE INDICATORS (KPI's)

Many executives turn right to this section as it provides a clear summary of the status of the project according the progress metrics. You should limit the metrics displayed to the most important. You want to avoid providing the same information in different formats. Fewer is better.

Schedule - Project is **On** Schedule

Schedule Variance (SV): +/- 7 days

Cost - Project is **On** Budget

Cost Variance (CV): \$0
